<https://less.works/course-details/certified-less-practitioner-da-nang-4058>

Are you involved in a complex software, firmware, or hardware development effort? Are you frustrated by poor value delivery, lack of creativity, unrealistic expectations, and/or the bureaucracy of a waterfall or SAFe structured product development organization? Are you trying to scale a startup without losing the nimble culture of a small company?

If you want to better understand for yourself, and be able to express to others, how organizational design impacts the ability to create an adaptable organization, you will benefit from my 3-Day Certified LeSS Practitioner (CLP) course.

The 3-day CLP course in Da Nang provides:

- Easy access by air from most of Asia
- Easy access within Vietnam by both air and train
- Luxury beach resort hotel rooms at exceptionally good prices
- A price of USD\$2299/person

Sincerely,
James Carpenter
Certified LeSS Trainer
